https://api.panoramax.xyz ↗	🌐 Global	Yes	No	Mixed	The <i>meta-catalog</i> list all pictures available across the public federation. After uploading an image, you may have to wait some time before it is visible on the meta-catalog ^[3] . (The `api` part of the URL is important. Without it, you're redirected to https://panoramax.fr/ ↗)
https://panoramax.openstreetmap.fr ↗	🇫🇷 France (and outside for tests)	Yes	Yes, with OSM-account	CC-BY-SA 4.0 ↗ (see below)	by OSM France In the short term, OSM FR can host pictures from the outside of France, but worldwide coverage is not sustainable in the long term, due to storage limits (and costs). Therefore, it is preferred that other local communities set up their own federated instances. ^[4]
