Continuations

We set out to map, for the first time...

1. Where are modal filters?

2. Which streets are through streets?

reet

Panton Street

St Eligius Place

berton Terrace

1013 ";

```

1. Identify particular street layouts
2. Convert to diagram as points & lines
3. Express diagram as database code
4. Searches map for all matches

Birmingham

Modal filters

Modal filters

Type of modal filter:

- Bollard
- Gate
- Gap
- Cycleway filter
- Bus gate

500 m

mapbox

2. LTNs— through/ non-through streets

+ Search locations and move map

Modal filters

LTNs

LTN statistics

OSM data

Modal filters and LTNs

Analysing where traffic is being filtered.

Low-Traffic Neighbourhoods (LTN) statistics

Statistics by Highway Authority area.

This work is highly experimental at present, with known bugs. We continue to refine the analysis.

Show types:

District/Unitaries*

* This option also includes London Boroughs and Metropolitan Districts.

Export (88)

www.lowtrafficneighbourhoods.org

Data

- Uses OpenStreetMap (OSM)
- Analysis covers UK & Ireland
- Online map (lowtrafficneighbourhoods.org)
- Public API (www.cyclestreets.net/api)
- GIS downloads
- Stats by city / ward

Impact

1. Proves they are widespread
2. Backs up infrastructure/advocacy work
3. Evidence to link to socio-demographics
4. Improve the quality of cycle routing
